In the Specification:

Please replace the paragraph at page 10, lines 11-24 with the following amended paragraph:

As illustrated in **Figure 3**, the CS-OS/390 operating system **70** includes a TN3270E server [[60]] **62** that acts as an interface between the IP network **56** and the SNA network **50**. The CS-OS/390 operating system **70** communicates with the IP network **56** via an IP stack **72**, which is operatively coupled to the TN3270E server [[60]] **62**. The CS-OS/390 operating system **70** likewise includes an SNA stack **74** (such as the Virtual Telecommunications Access Manager or "VTAM") via which the operating system may communicate with devices in the SNA network **50**. The SNA stack **74** is likewise operatively coupled to the TN3270E server [[60]] **62**. Profiles **76** associated with client terminals in the IP network may be stored by the TN3270E server [[60]] **62**.
